

# Sensor budget versus Reynolds number

(a) Kinetic energy

(b) Vorticity

Sensor count  $K$  (dimensionless)

$\text{---}\triangle\text{---}$   $Re = 10^2$      $\text{---}\square\text{---}$   $Re = 5 \times 10^2$      $\text{---}\circ\text{---}$   $Re = 10^3$      $\text{---}\diamond\text{---}$   $Re = 10^4$      $\text{---}\nabla\text{---}$   $Re = 10^6$
